EDUCATION

Harvard University – Cambridge, MA
Bachelor of Science, Computer Science

Graduating May 2027

Relevant Coursework: Data Structures and Algorithm, Intro to Computer Science (CS50), Discrete Mathematics, Intro to Algorithms, Data Visualization, Linear Algebra, Data Structures and Algorithms, Systems Programming

TECHNICAL SKILLS

Languages: Python, Java, Swift, Kotlin, C/C++, SQL, JavaScript, PHP, Hack, Dart, HTML/CSS

Technologies: Flask, Bootstrap, Docker, Git/GitHub, ReactJS, NodeJS, TensorFlow, ExpressJS, Taipy, MongoDB

PROFESSIONAL EXPERIENCE

Harvard University - Cambridge, MA

Mar 2025 - Present

Student Application Developer

- Developed and maintained backend services using Nest.js, PostgreSQL, and TypeORM, boosting API response speed by 35%
- Built and optimized RESTful APIs, improving data integrity and reducing server errors by 25%

Salesforce (Slack) - San Francisco, CA

May 2025 - Aug 2025

Software Engineer Intern

- Built and tested backend logic for silent file sharing in Canvas' share modal, enabling seamless file sharing without triggering notifications.
- Developed and integrated RESTful APIs to support custom file sectioning, improving organization and reducing retrieval time by 20%.
- Implemented integration tests and optimized error handling to deliver production-grade quality across backend services.

Melit Trade – Remote

May 2024 - Aug 2024

Software Engineer Intern

- Developed a full-stack international trading and e-commerce platform, facilitating seamless transactions for users across 4 countries, by using **React.js**, **Node.js**, and **MongoDB**,
- Enhanced site responsiveness and scalability, reducing page load times from ~1 min to ~30 secs, by implementing **Redux** for state management.

Vodafone Ghana – Accra, Ghana

May 2023 - Jul 2023

Software Engineer Intern

- Collaborated in a cross-functional team, adhering to **agile methodologies**, to develop an **AI chatbot** using **Kotlin and Java**, enabling efficient customer support via natural language interactions.
- Integrated **TensorFlow Lite** and **Google's Machine Learning Kit** for **natural language processing (NLP)**, allowing the chatbot to understand and respond intelligently to user queries.

PROJECTS & OUTSIDE EXPERIENCE

Expensso AI | Swift, SwiftUI, Firebase Firestore, OpenAI API

[Project Link](#)

- Developed an **AI-powered** expense management app for iOS and iPadOS, **utilizing Swift and SwiftUI** to create a responsive and adaptive user interface.
- Integrated Firebase Firestore for real-time sync and secure multi-device data storage
- Implemented NLP via OpenAI API to enable AI-driven voice/text logging and expense insights

Crimson Mart | Flask, SQL, JavaScript, Bootstrap

[Project Link](#)

- Developed a secure e-commerce platform using Flask and SQL with encrypted authentication, session management, and a streamlined checkout process
- Implemented product listings and shopping cart functionality with a responsive front end using HTML, CSS, JavaScript, and Bootstrap, increasing user engagement.

LEADERSHIP & CAMPUS INVOLVEMENT

[Domi Technologies](#), (Software Developer), **HSBSE** (Senior Rep), **Harvard Undergraduate Machine Intelligence Community** (Member), **ColorStack**(Community Member)
